# **Quantification of P-glycoprotein function using [<sup>18</sup>F]MC225 PET**

Giordana Salvi de Souza

This thesis is valid for a double PhD degree as a collaboration between the University of Groningen, the University Medical Center Groningen, and the Pontifical Catholic University of Rio Grande do Sul. The work on this book has been carried out in the Department of Nuclear Medicine and Molecular Imaging of the UMCG.

The research contained in this thesis was financially supported by the Abel Tasman Talent Program (ATTP) of the University of Groningen (UG), the Netherlands, the Research School of Behavioral and Cognitive Neuroscience of UG, and the Comissão Nacional de Energia Nuclear (CNEN) of Brazil.

The Library of the University of Groningen financially supported the printing of this thesis.

# Quantification of P-glycoprotein function using [ $^{18}\text{F}$ ]MC225 PET

## PhD thesis

to obtain the degree of PhD at the  
University of Groningen  
on the authority of the  
Rector Magnificus Prof. J.M.A. Scherpen  
and in accordance with  
the decision by the College of Deans

and

to obtain the degree of Doctor of Biomedical Gerontology at the  
Pontifical Catholic University of Rio Grande do Sul  
on the authority of the  
Rector Magnificus Prof. M. Mentges  
and in accordance with  
the decision by the College of Deans.

Double PhD degree

This thesis will be defended in public on  
Wednesday 23 April 2025 at 14:30 hours
